OBJECTIVE

User Interface Design

- User Interface Design I
 - In this course, we learn the fundamentals of organizing various design elements to create screen layouts as well as creating flowcharts and wireframes, how to conduct background research and team working to accomplish a single low and high-fidelity prototype using Axure RP 9. By accomplishing a variety of engaging assignments, we put our newly developing skills to the test by creating roughs, sketches low and high-fidelity prototype
- User Interface Design II
 - Expanding on our pre-existing knowledge of User Interface Design, we worked as a class on a major project, completing milestones with our assigned teams. The main goal was to redesign the interface for a tutoring website

User Experience Design

- User Experience Design I
 - In this course, we began to learn about research and psychology behind design. We also began to learn how to conduct background research before starting a project by learning about different ways to gather data from interviews, surveys and focus groups
- User Experience Design II
 - Using our pre-existing knowledge, we worked on a major project building a mobile application. Us students in the Computer Graphics Technology program worked in teams creating UI and UX design for the application. We collaborated with the Computer Information Technology students to create the application

EDUCATION

Purdue Northwest University
Hammond, IN

Bachelor of Computer Graphics
Technology

Fall 2018 – Spring 2022

KEY SKILLS

- CREATIVITY
- LEADERSHIP
- ORGANIZATION
- PROBLEM SOLVING
- TEAMWORK
- TIME MANAGEMENT

AWARDS

- ACADEMIC HONORS

WORK EXPERIENCE

September - March 2020

Dairy Queen Grill and Chill

552 Indian Boundary Rd Ste A&B

- Cashier
 - Working as a cashier, I took orders and handled financial transactions for both the front register and drive through. It was part of my job to run orders out to tables and keep the front of the store clean. My team members and I would take turns completing more difficult weekly cleaning jobs that help maintain the cleanliness of the store
- Shift Lead
 - As a shift lead, I was responsible for closing the store at night, ensuring that the lights were off, security system enabled and all doors and drive through windows locked. I was also responsible for counting the registers at the end of the night and ensuring the correct amount of money was in the register for the next shift. I worked with the crew members to ensure that everyone was working well together and completing the duties asked of them. We worked as a team to clean the store, take orders, and make the products correctly by portioning and weighing them before serving.

June 2020 – Current

Dairy Queen

1249 Broadway, Chesterton, IN 46385

- Crew Member
 - Some of my duties include providing excellent customer service and making food and ice cream orders. I also help train new employees. I mostly run the cash register, taking orders through drive through and handling financial transactions. Though it may not seem like it, our cleaning duties are very detail oriented, making sure the store stays spic and span! Between cleaning the store top to bottom, us crew members work as a team to ensure that everything is run smoothly to give our guests the best experience while they visit our store
